

Uncovering The Root Of The Problem.

Late or missed detection of farming issues leads to an annual loss of

\$540 Billion

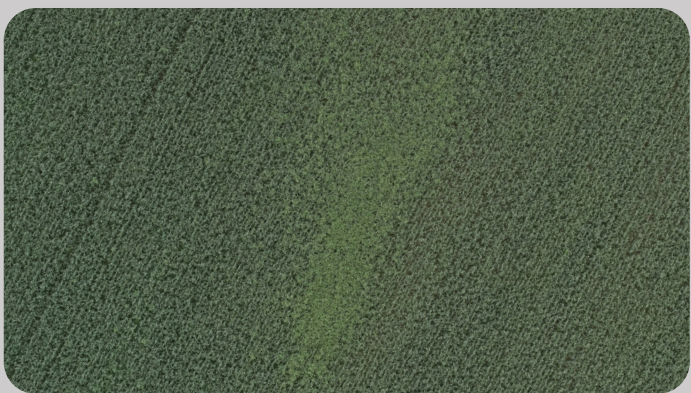

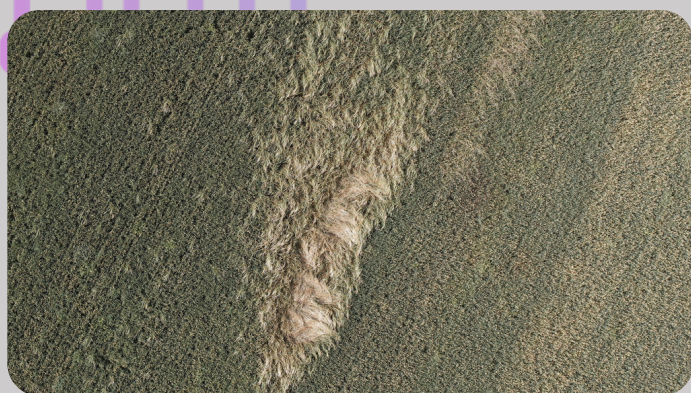

Most of these losses are preventable with timely identification and intervention

Our Solution

Creating the first early indicator tracing AI engine for agricultural issues.

While engaging with farmers and creating value from day one

By tracking back data from detected problems, we identify crop issues at their earliest stages, saving valuable time and preventing field damage.

Collaborations and LOIs:

Hezera

Global leader in the seed industry.

Mop Yaham

Renowned agricultural R&D center for crop fields.

Tzabar Kama

One of the biggest and most professional farms in Israel.
