

GG BIOLOGICALS

Generating Growth

GG BIO IS A NEW CONCEPT OF AGRICULTURE THAT IS BORN FROM THE NEED TO REGENERATE THE SYMBIOTIC RELATIONSHIP BETWEEN SOIL AND PLANTS.

- GG Bio understands the value of increased soil fertility and utilizes a regenerative approach to unlock its hidden benefits.
- GG Bio Introduces a unique blend of unmodified localized microorganisms that break down unavailable nutrients and deliver them to the plants.
- GG Bio provides a tailor-made treatment plan for our customers to ensure the maximum efficiency of the microorganisms.
- GG Bio Focuses on long-term results. By using our products and strategies farmers can plan for their next crop, as well as the next generation.
- GG Bio products are produced using purely natural processes.

Generating Growth

Our vision is to guide the industry towards cooperation with nature. We believe in the use of beneficial biology paired with modern technology in order to restore our soil health and in turn, revive our farms and our ecosystems.

Compounding Benefits of the GG System

- Reduction of mineral fertilizers usage
- Increasing soil fertility & stability
- Increasing yield
- Increasing plant health
- Increasing crop quality
- Sequestering carbon

GG's Bio SAAS

EcoNet incorporates a unique combination of localized tailored microorganisms along with a base blend of microbes. This strategic formulation allows EcoNet to effectively address the specific needs of the crop by creating a stable ecosystem.

GG Grow is a revolutionary universal liquid biostimulant. With a unique blend of organic compounds and probiotic microbes, GG Grow is designed to unlock the full growth potential of plants and microbial communities by harnessing the power of nature.
