
Company description:

GALMOBILE Ltd. has been a leader in the water treatment and wastewater solutions industry for over 28 years. Our extensive experience has allowed us to provide advanced and effective solutions for Industry, Agriculture, and Drinking water. We pride ourselves on offering a combination of advanced technologies and unique control systems that guarantee reliable operation.

In response to the challenge of lack of fresh clean water in the first 72 hours following natural disasters or terrorist attacks, we have developed our latest innovation, GALMOBILE™. This revolutionary water purification vehicle is the world's first of its kind. It addresses the problem of lack of fresh, clean water by providing a mobile water purification system that can connect to any water source, including rivers, lakes, oceans, wells, brackish water, and highly turbid water, and produce high-quality drinking water per WHO standards.

Introducing GALMOBILE™ - Your Solution for Clean and Accessible Water Anywhere

GALMOBILE™ Revolutionizes Water Purification and Desalination with an innovative and effortless approach. Our cutting-edge concept ensures safe drinking water availability, no matter the source. Designed to meet WHO standards, GALMOBILE™ offers unrivaled versatility, purifying river, brackish, fresh, sea, well, sewage, and mine water sources.

Key Features and Benefits:

1. **Aesthetic Innovation:** GALMOBILE™ merges functionality with aesthetics. Its dynamic design, integrated with an ATV, enhances visual appeal, making water production a captivating spectacle.
2. **All-In-One Solution:** GALMOBILE™ is a plug & play marvel, requiring no external equipment. With a simple button press, it transforms any water source into pristine drinking water in under 30 minutes.
3. **Next Level Mobility:** GALMOBILE™ is a self-contained water purification and desalination powerhouse on wheels. It can be quickly deployed to areas suffering from water shortages due to natural disasters, remote locations, or infrastructure limitations. Say goodbye to logistical headaches and hello to rapid water access.
4. **User-Friendly:** No technical expertise needed! Operate GALMOBILE™ with ease - it doesn't demand a certified engineer. Any licensed driver can harness its capabilities.
5. **Automated Excellence:** GALMOBILE™ is fully automatic. It discerns the water source, applies the necessary treatment, and executes the process independently - no manual input required.
6. **Remote Monitoring:** Stay informed with real-time monitoring. Track water production, system health, and pinpoint malfunctions. Receive alerts and troubleshoot with confidence.
7. **Low Voltage, High Safety:** Operating at 12Volts, GALMOBILE™ ensures safety without compromising efficiency. Unlike high-voltage alternatives, it eliminates the need for generators.
8. **Adaptable and Light:** Weighing only 1.1 tons, GALMOBILE™ trumps heavy competitors (8-12 tons).
9. **Global Applications:** GALMOBILE™ serves as essential infrastructure, saving costs for militaries and in water-deprived regions. It's a lifeline during disasters, guaranteeing rapid water supply.
10. **High-Tech Mastery:** GALMOBILE™ tackles even the most polluted sources, thanks to its advanced technology.
11. **Sustainability Champion:** GALMOBILE™ takes a green approach to water purification. With its energy-efficient design and eco-friendly practices, it aligns with global sustainability goals, minimizing plastic waste associated with conventional bottled water solutions.
12. **Research and Innovation Hub:** GALMOBILE™ isn't just a solution; it's a platform for ongoing research and innovation. We continually improve our technology and create new methods to stay at the forefront of water solutions.
13. **Cost-Efficiency:** When compared to traditional methods of water purification and water transportation, the GALMOBILE™ is a cost-effective solution. It reduces the logistical and financial burden of providing clean water to underserved areas.
