

ELSSWAY

Just Drive | Charging is on us

Urban Electrification: Driving Market Opportunity

Cuts Gigatons of CO₂ emissions

Growing adoption of Efficient, Compact Transportation

A flood of Light Electric Vehicles (LEV)

E-Scooters, E-Bikes, Delivery Drones and Robots, Mopeds, Logistic vehicles, Mini-EVs

The Problem: E-Fleets Are Ready, CHARGING ISN'T

Empty battery

-> Low availability

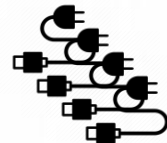

Fast charging

-> Short battery life, and a Safety risk

Battery swapping

-> High Labor costs

Charging Hubs

-> Rental cost, Operational complexity

The Solution: **Charge Where You Park**

Wireless Charging-As-A-Service

Seamless - No cables, No Docking, Safe and Secure

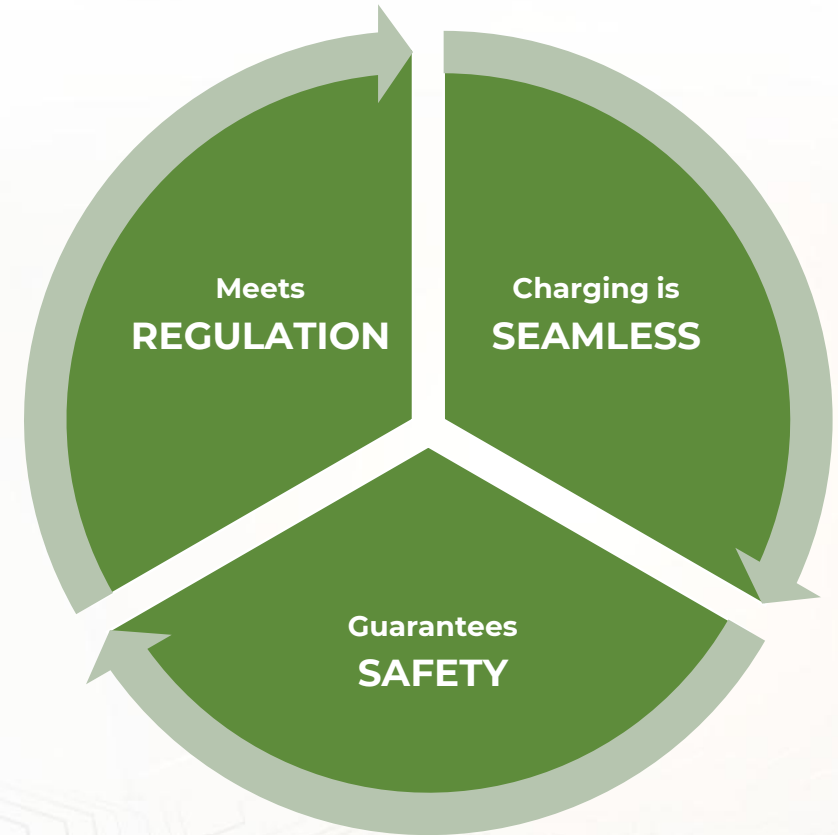

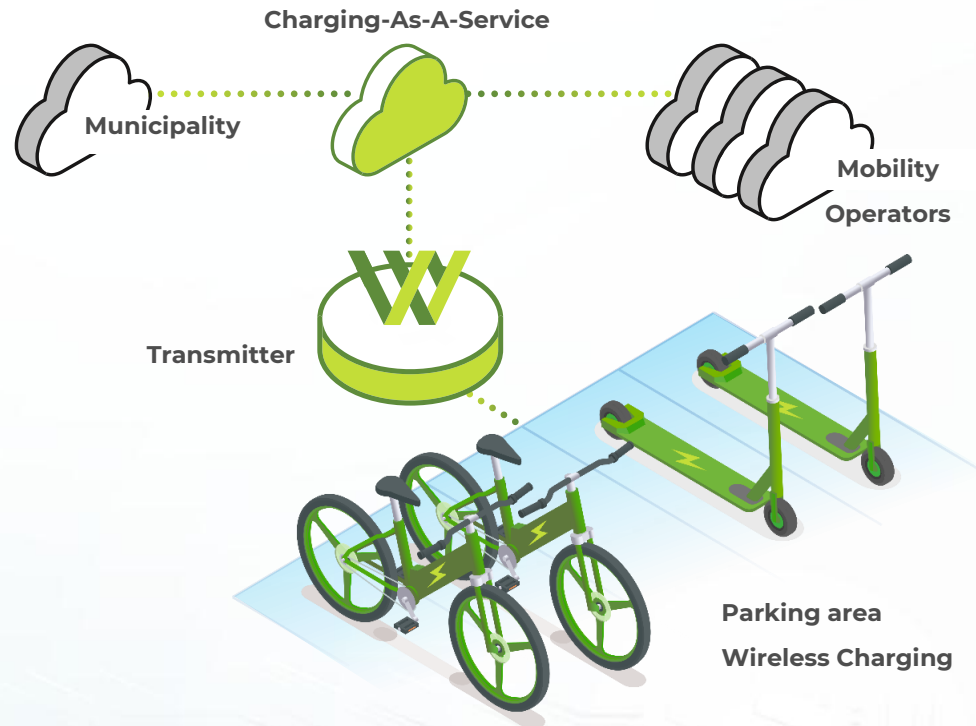

Streets, Train stations, Retail, and Office buildings

Accessible anywhere, Simple and Clean

Charge-As-A-Service

Designed with ORDER and SAFETY in mind

Wireless Charging: Seamless and Frictionless

Key advantages

Seamless connection

No alignment restriction

Minimal infrastructure

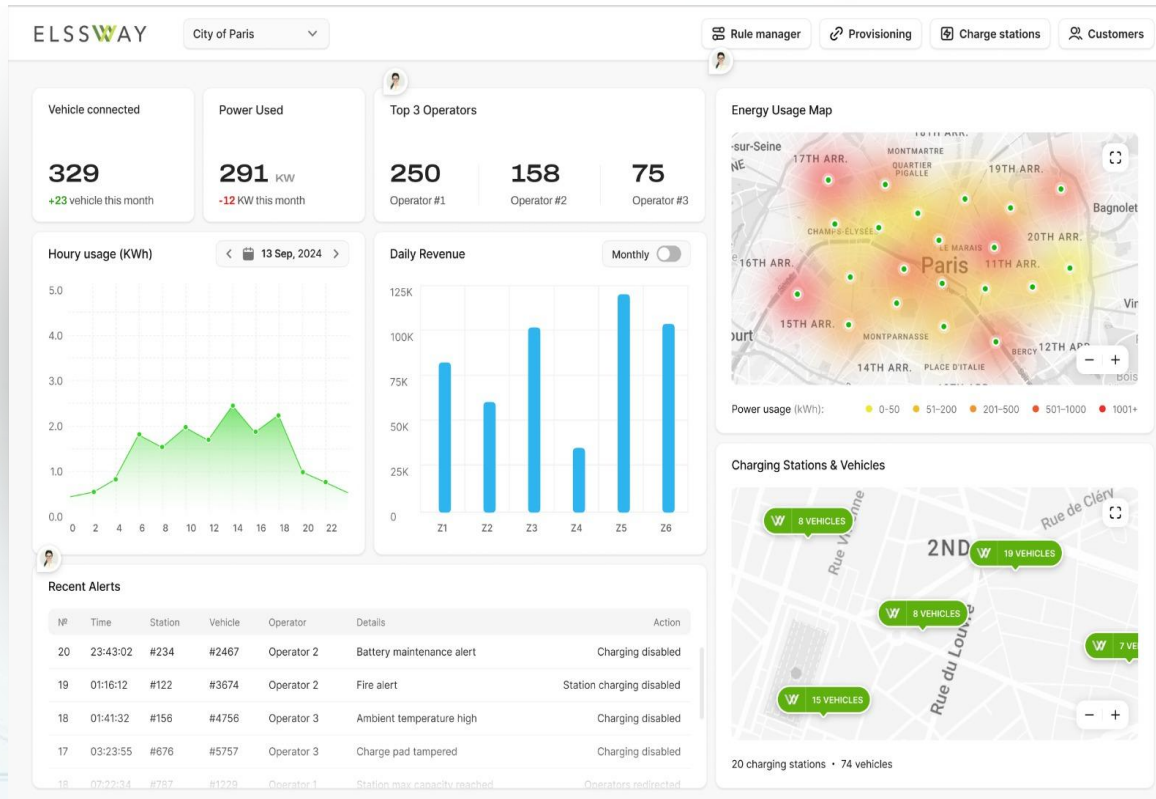

Robust, all Weather

Validates accurate parking

Designed with COST and SIMPLICITY in mind

A Charging Platform: Making Order, Meeting Regulations

Key features

City and Customer APIs

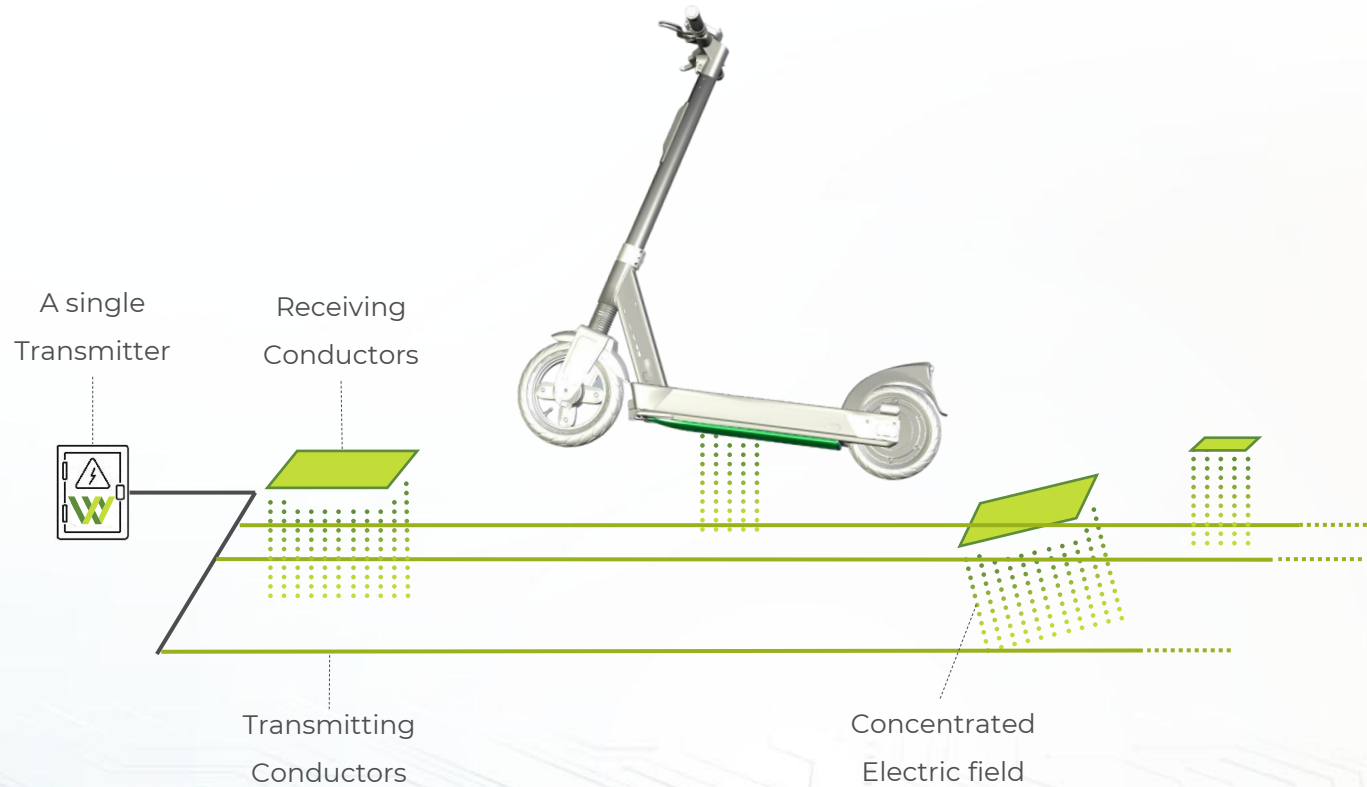

Smart Load Balancing

Route Prediction and optimization

Alerts and Notifications

Designed with CITIES and OPERATORS in mind

Technology: True Wireless Energy Transfer

Key advantages

Thin and cheap antennas

No vehicle alignment required

Accessible over a large parking space

Easy to upgrade

Robust and Light weight

Scalable, Robust and SAFE

Wireless Power Receiver

Wireless Power Receiver

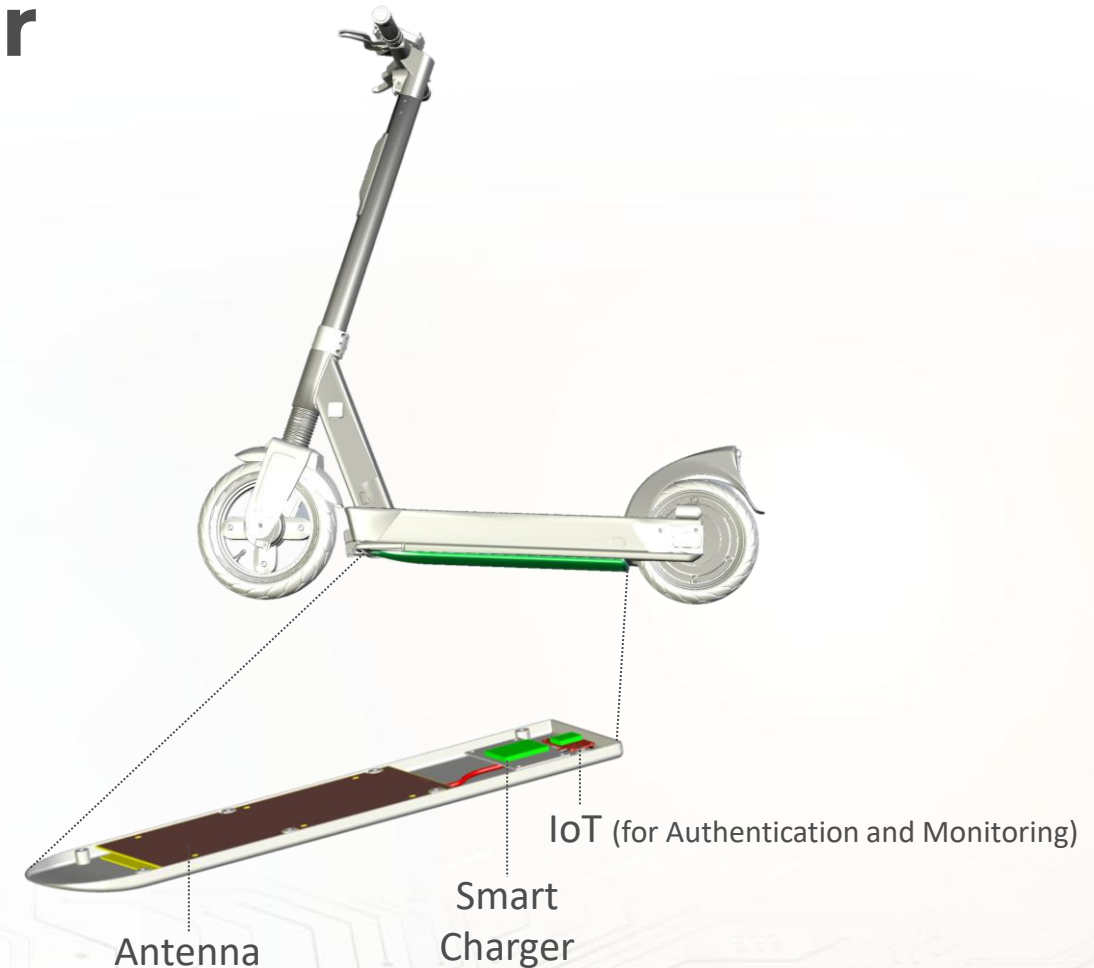

Thin and super light weight

Customizable to many LEVs

Easy to integrate

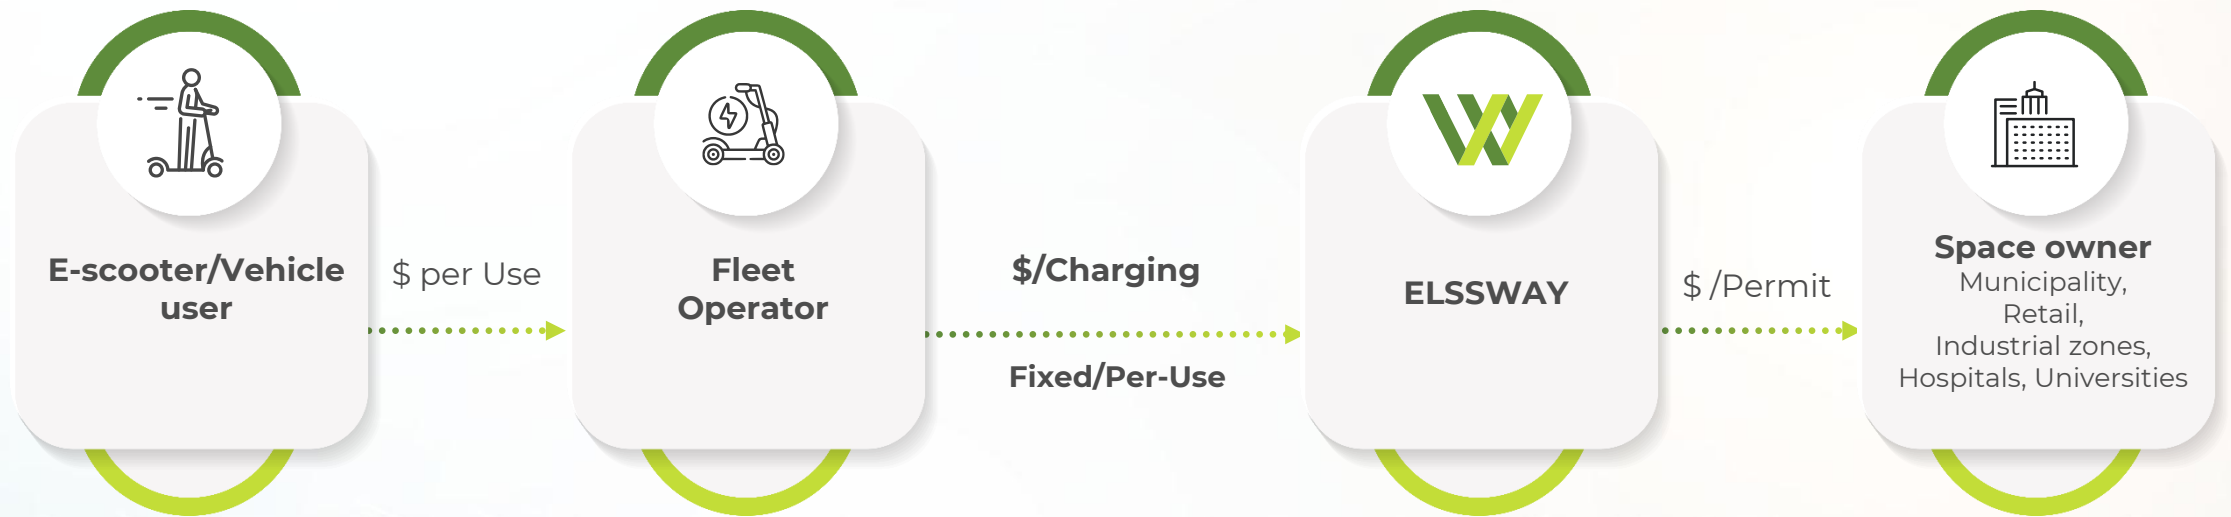

Reliable and Robust

0.1KW(e-scooters)-3KW(Golf car)

COMPATIBLE and Easy to INTEGRATE

Business model

Helping Operators become PROFITABLE

The logo for ELSSWAY, featuring the word in a sans-serif font. The 'W' is stylized with two overlapping green and yellow diagonal stripes.
