

MANA

See Waste.
Stop Loss.
Grow Smarter.

Unlock Efficiency, Cut Costs, Maximize Profit.

The Problem:

Waste is a **silent killer** of profitability. Hidden losses from overfills, line stops, and product defects erode margins and drain resources

The Solution:

Mana turns **hidden waste** into **visible opportunity**. We connect directly to your IoT network to detect, quantify, and mitigate waste.

Improve Metrics with MANA:

We pride ourselves on achieving seamless integration and immediate cost saving outcomes in every project we undergo. Our AI model is guaranteed to achieve results in:

- ✓ Food Waste Reduction
- ✓ Wastewater Production
- ✓ Energy Consumption
- ✓ Overfills
- ✓ Line Stops
- ✓ Waste Diversion

What We Deliver:

Live Monitoring:

Utilize in-house cameras, scales, and sensors to detect loss.

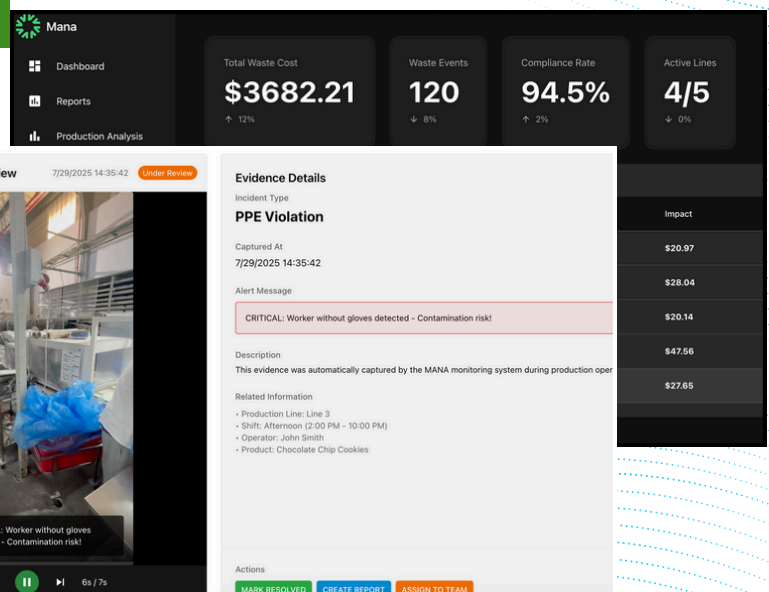

Instant Quantification:

Translate each waste instance into live weight and carbon data.

AI Optimization:

Receive instant AI-driven alerts with real-time mitigation tactics.

Join us in cultivating a more efficient, responsible, and sustainable food future.
