

Harnessing the power of AI to revolutionize the way we measure environmental impact

Market demands fast, detailed emissions reporting. Gain a competitive edge with seamless ESPR & DPP compliance, while uncovering hotspots, reducing footprint, and saving costs across your value chain

By 2027, various products sold in the EU must have a Digital Product Passport, requiring verified LCAs
(EU Resolution 2024/1781)

Traditional LCAs are slow, complex, and costly

LCAi revolutionizes the process with a unique AI-agent architecture, delivering fast, accurate, and cost-effective LCAs

Stay ahead of regulations, effortlessly - and turn compliance into opportunity.
